Ulisse wall outlets
Polished chrome
Ulisse wall outlets are also available in 250mm length

Product Washplane®
Behavioral changes over the years indicate that we are now using a continuous flow of clean water, rather than using soiled water in a plugged basin. Without the need to hold water, a basin could be slim, elegant and sculptural, and at the same time use considerably less water through the utilisation of a restricted water outlet, such as the Omvivo Ulisse outlet.
Each washplane® is designed and manufactured in Australia. The three styles, Geo, Linea and Onda are available in a range of unique finishes and are supplied with the hardware and drainage system to be installed into a cavity wall. A 150mm wall outlet for a Single 800mm Washplane® and a 200mm wall outlet for all others is recommended. Outlets must use 5-7 litres per minute with the water falling at a 90 degree angle directly onto the Washplane® top.

Geo washplane®
Featuring generous structure and sharp clean lines, the Geo washplane® is a strong, uncomplicated design.

Linea washplane®
The subtle square form of the Linea washplane® combined with the use of fine materials creates a unique contemporary piece.

Onda washplane®
The soft fluid lines of the Onda washplane® form an elegant piece that has universal appeal.

Finishes Natural stone
Noir, sand and carrara are natural stone materials. Each Omvivo piece is handcrafted from a slab of solid stone. For thousands of years natural stone has been known as a premium material. Today stone is still admired worldwide for its beauty, strength and personality. The natural occurrence of vein, fossils and quartz creates uniqueness and individuality in every Omvivo stone product.

Solid surface
The name 'Solid Surface' encapsulates brands such as Corian®, Marblo®, Cristalplant® and more, materials that are created from combinations of high performance acrylic or polymer and natural minerals. Omvivo selects the best Solid Surface materials for the collection. They are particularly hard-wearing and non porous, making them highly stain resistant and scratches, marks and scuffs can be buffed out. The matt white finish has a contemporary aesthetic that is appealing for architectural environments.

Omni glass
Italian Omni glass is superior in quality and finish. The acid etched top surface creates a luminescent appearance that is resistant to marks including fingerprints and watermarks. Omni glass is colour backed in standard finishes and can also be custom coloured.

Seafoam glass
The Seafoam glass washplane® is created from 19 mm high quality glass, with a subtle, consistent texture on the underside and a smooth top surface. The texture combined with the thickness of the glass suggests bubbling, running water, creating a calming experience for the user.
